

# Green bonds issued on February 16, 2026

## Environmental Impact (March 2026)

### Renewable Energy

| Category         |              | Projects | Annual Energy Production<br>(Unit: MWh) <sup>1</sup> | Mizuho's Contribution <sup>3</sup> to Expected CO <sub>2</sub> Emission Reductions<br>(Unit: tons of CO <sub>2</sub> /year) <sup>2</sup> |
|------------------|--------------|----------|------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------|
| Renewable Energy | Solar        | 3        | 3,908,686                                            | 213,455                                                                                                                                  |
|                  | Wind         | 5        | 10,994,711                                           | 355,048                                                                                                                                  |
|                  | Solar + Wind | 1        | 3,475,618                                            | 198,065                                                                                                                                  |
| Total            |              | 9        | 18,379,015                                           | 766,568                                                                                                                                  |

Notes:

1. Total production for all projects.
2. Annual expected CO<sub>2</sub> emission reductions are based on the concept of Avoided Emissions under [PCAF](#) Guidance. We use the emission factors of fossil fuels that are consumed to generate the biggest electricity in the region that the project is located, and calculate CO<sub>2</sub> emission reductions contributed by the renewable power projects that Mizuho finance.
3. Calculated by multiplying the project expected CO<sub>2</sub> emission reductions by the ratio of Mizuho's outstanding debt of the total project cost (Mizuho's Attribution Factor). Mizuho's Attribution Factor is in line with [PCAF](#) Guidance.

### Green Building

| Category       | Number of Buildings <sup>4</sup> | Number and certification level of green buildings <sup>5</sup> |                                          |                    |                                       |
|----------------|----------------------------------|----------------------------------------------------------------|------------------------------------------|--------------------|---------------------------------------|
|                |                                  | LEED <sup>6</sup>                                              | CASBEE <sup>7</sup>                      | DBJ Green Building | BELS <sup>8</sup>                     |
| Green Building | 3                                | -                                                              | S rank: 1 property<br>A rank: 1 property | -                  | (2016 version)<br>5 stars: 1 property |

Notes:

4. Number of Buildings which have received classifications
5. As some buildings obtained more than one certifications, the total numbers don't match with the number of buildings
6. LEED : Leadership in Energy and Environmental Design
7. CASBEE : Comprehensive Assessment System for Built Environment Efficiency
8. BELS : Building-Housing Energy-efficiency Labelling System
