(III) 未經審核其他資產負債表資料**(1) 於總行為香港分行所撥備之準備金**

屬一般性質
屬特殊性質

註銷 / 準備金

本行會根據內部註銷和撥備指引為綜合附屬公司維持準備金：

(i) 普通貸款人

估計不履行債務金額是按照未來一年度在各貸款人評級下，無法償還貸款之機會計算，並根據貸款人的貸款及資產負債表以外之項目適當撥備一般性質之準備金。

(ii) 需要控制之貸款人

估計不履行債務金額是按照未來三年度在各貸款人評級下，無法償還貸款之機會計算，並根據貸款人的貸款及資產負債表以外之項目適當撥備一般性質之準備金。此外，倘需要特別關注之貸款人之未償還貸款超過特定金，若將來從本金及利息所得之現金流量可被合理地估計，成立一個根據貸款人的貸款及資產負債表以外之項目以現金流量現值計算之準備金。

(iii) 密切監察之貸款人

貸款及資產負債表以外之項目的特殊性質準備金在扣除預計可從貸款抵押品銷售之回收款項及預計從貸款擔保人之回收款項後，可根據以下其中一個方法計算：

一) 金額根據貸款人之全面還款能力計算。

二) 估計不履行債務金額是按照不履行債務結餘及其未來三年無法償還貸款之機會而計算。此外，倘需要特別關注之貸款人之未償還貸款超過特定金額，若將來從本金及利息所得之現金流量可被合理地估計，成立一個根據貸款人的貸款及資產負債表以外之項目以現金流量現值計算之撥備。

(iv) 瀕臨破產之客戶

金額以債務結餘扣除預計可從貸款抵押品銷售之回收款項及預計從貸款擔保人之回收款項後，根據貸款人的貸款及資產負債表作特殊準備帳之準備金，或全數直接註銷。

(v) 破產之客戶

金額以債務結餘扣除預計可從貸款抵押品銷售之回收款項及預計從貸款擔保人之回收款項後，根據貸款人的貸款及資產負債表作特殊準備帳之準備金，或全數直接註銷。

(III) Unaudited Additional Balance Sheet Information**(1) Provision for bad and doubtful debts booked at head office**

General provision
Specific provision

Total

Write-offs/Provisions

Reserves for Possible Losses on Loans of major domestic consolidated subsidiaries are maintained in accordance with internally established standards for write-offs and reserve provisions:

(i) Normal Obligors

Calculate the value of estimated loss based on the probability of failure over the coming year for loans by obligor rating and appropriate it for the general provision for credit losses on loans and off-balance-sheet instruments.

(ii) Watch Obligors

Calculate the estimated loss on loans based on the probability of failure over the next three years and appropriate it for the general provision for credit losses on loans and off-balance-sheet instruments. Further, in regard to special attention obligors, for obligors with large claims more than a certain amount, if the cash flow from the return of principal and interest payments can reasonably be estimated, set up a provision for credit losses on loans and off-balance-sheet instruments under the DCF method.

(iii) Intensive Control Obligors

Provide an amount for specific provision for credit losses on loans and off-balance-sheet instruments as calculated by one of the following methods after deducting amounts anticipated to be recoverable from the sale of collateral held against the claims and from guarantors of the claims: a) an amount calculated based on the overall ability of the obligor to pay, or b) the estimated loss calculated on the basis of the balance and the probability of failure over the next three years. Further, for obligors with large claims more than a certain amount, if the cash flow from the return of principal and interest payments can reasonably be estimated, set up a provision for credit losses on loans and off-balance-sheet instruments under the DCF method.

(iv) Substantially Bankrupt Obligors

Provide the entire balance after deducting amounts anticipated to be recoverable from the sale of collateral held against the claims and from guarantors of the claims for specific provision for credit losses on loans and off-balance-sheet instruments, or charge-off the entire balance.

(v) Bankrupt Obligors

Provide the entire balance after deducting amounts anticipated to be recoverable from the sale of collateral held against the claims and from guarantors of the claims for specific provision for credit losses on loans and off-balance-sheet instruments, or charge-off the entire balance.

(VII) 流動性資料披露(續)

(8) 流動資金風險管理

1. 概述

流動性風險被定義為因財務狀況惡化所導致資金籌措困難，可能引發損失的情況，這可能使得獲取必要資金變得困難，或迫使集團以顯著更高的利率籌集資金。

在香港分行，流動性管理政策與程序（LMP）專門制定，以概述符合當地業務環境和條件的流動性策略及目標。

2. 風險容忍度

香港分行對流動性風險採取保守的風險容忍度。其設計旨在確保在正常及壓力市場條件下，能夠履行所有到期付款義務。此容忍度通過流動性維持比率（LMR）及內部流動性緩衝等關鍵指標表達，並設定超過香港金融管理局（HKMA）規定的最低要求。

3. 流動性風險治理及職責

香港市場風險及資產負債委員會（ALCO）由本地管理層、香港財務部及風險管理部的核心成員組成，定期及必要時召開會議，審查並討論重要的流動性風險管理事宜。

香港分行確保流動性風險策略、政策及實踐在所有相關業務線之間有效溝通。在辦公室內部，定期進行開報，確保包括企業銀行、貿易融資及財務部在內的業務單位了解其在維持流動性記錄中的角色。

4. 資金策略

總行負責對全球範圍的美元流動性進行控制，以優化資金效率。香港分行主要負責管理包括港元（HKD）及人民幣離岸（CNH）在內的本地貨幣。香港分行持有足夠數量的高質量流動性資產，主要為政府證券，以便在流動性緊張時及時應對資金需求，並致力於多元化資金來源及期限，以穩定控制流動性及資產負債表。短期融資包括在本地及海外市場進行銀行間交易拆借、吸收不同商業企業客戶存款，以及通過交易商向投資者發行一年期以下的存款證。長期融資包括銀行同業回購及交叉貨幣掉期，以穩定港幣資金，期限與客戶資產相匹配，並採用多元化到期日，以避免集中風險。

5. 流動性風險分類及預警指標

瑞穗金融集團將流動性風險分為三個階段，並設置預警指標（EWI）以主動管理風險。

5.1 流動性風險分類

- 正常階段：對獲取足夠資金沒有擔憂。
- 緊縮階段：對獲取足夠資金存在擔憂。（例如，為了獲取必要資金，銀行必須支付顯著高於正常水平的利率）
- 危機階段：無法獲取所需資金，且現金籌措可能出現中斷的高度潛在風險。

5.2 預警指標（EWI）

預警指標包括一系列定量及定性指標，例如資金利率、存款趨勢及市場狀況，將每日監控以便早期識別風險。這些指標根據香港辦公室的風險狀況敏感性及資金需求分別確定。任何超標情況將進行討論並考慮必要的補救措施。

6. 流動性壓力測試

瑞穗主要通過壓力測試來管理流動性風險。

香港分行通過應用內部及監管定義的情景進行流動性壓力測試。這些情景包括以下因素：

- 市場壓力：如金融市場波動、經濟衰退或系統性銀行危機等事件。
- 特定壓力：機構特定的衝擊，例如市場信心喪失或信用評級下降。
- 綜合壓力：市場壓力及特定壓力的混合，以評估最壞情況的結果。

情景根據監管指導方針、歷史數據及專家判斷進行設計，並定期審查以確保其保持相關性並反映不斷變化的市場條件、監管期望及香港辦公室的風險情況。

流動性壓力測試結果定期計算，涵蓋不同的時間範圍、貨幣及特定風險問題。這確保了香港分行在各種維度上的流動性狀況進行全面評估。如果結果顯示存在漏洞或不滿意的結果，ALCO負責制定及批准補救措施，包括增強流動性緩衝、多元化資金來源或修訂應急資金計劃。

7. 流動性風險指標

香港分行計算並定期監控不同的指標，例如流動性維持比率（LMR）及核心資金比率（CFR）等，作為監控框架的一部分並遵守內部及監管要求。

8. 流動性風險緩解技術

香港分行採用一系列技術來緩解流動性風險，體現其主動的風險管理方式。分行保持多元化的資金基礎，包括同業借款、客戶存款及使用瑞穗銀行的全球資金網絡。

高質量流動性資產（HQLA）資產組合主要由政府證券及其他符合香港金融管理局（HKMA）要求的工具組成，以提供流動性緩衝。辦公室還參與香港金融管理局的貼現窗口（Discount Window）機制，使用外匯基金資產及債券作為抵押品，以便在需要時獲取隔夜流動性。此外，嚴格執行對期限錯配及集中風險的限制，防止過度依賴單一資金來源或期限。

9. 應急資金計劃及恢復計劃

香港分行的應急資金計劃（CFP）是其流動性風險管理框架的重要組成部分。該計劃旨在確保香港辦公室能夠有效應對潛在的流動性危機，通過識別可靠的資金來源並制定可行策略來應對不利條件下的資金短缺。

CFP包括以下核心要素：

- 觸發事件：明確定義啟動CFP的觸發條件。
- 資金來源：多元化的資金選擇，例如利用香港分行流動性緩衝中的高質量流動性資產（HQLA），進入有抵押及無抵押資金市場，以及啟動與交易對手或中央銀行的承諾信用額度等。
- 角色及職責：明確的治理結構，指定高級管理層、財務團隊及其他利益相關者在執行CFP中的角色。

作為香港辦公室準備工作的一部分，定期進行CFP演練。這些演練模擬壓力情景並測試CFP的操作準備，包括訪問替代資金來源、通信協議及決策流程。演練結果由高級管理層審查，以識別改進領域並確保計劃在實際流動性危機中的有效性。

(VII) Liquidity Information Disclosure (cont'd)

(8) Liquidity Risk Management

1. Overview

Liquidity risk is defined as the potential loss arising from funding difficulties due to a deteriorating financial position, making it hard to secure necessary funds or forcing the group to raise funds at significantly higher interest rates.

In Hong Kong Office, liquidity management policies and procedures (LMP) are formulated to outline the liquidity strategy and goals specific to the local business environment and conditions.

2. Risk Tolerance

Hong Kong Office maintains a conservative risk tolerance for liquidity risk. It is designed to ensure it can meet all payment obligations as they fall due, under both normal and stressed market conditions. This tolerance is expressed through key metrics such as the Liquidity Maintenance Ratio (LMR) and internal liquidity buffers, which are set to exceed regulatory minimums established by the HKMA.

3. Liquidity Risk Governance and Responsibilities

The Hong Kong Market Risk & Asset and Liability Committee (ALCO) comprising key members from local management, Hong Kong Treasury Division and Risk Management Division, conducts meeting on a regular and when necessary basis to review and deliberate important liquidity risk management matters.

Hong Kong Office ensures effective communication of its liquidity risk strategy, policies, and practices across all relevant business lines. Within the Office, regular briefings are conducted to ensure that business units, including Corporate Banking, Trade Finance, and Treasury, understand their roles in maintaining liquidity discipline.

4. Funding Strategy

Head office control USD liquidity on global basis to optimize funding efficiency. Hong Kong Branch is mainly responsible for managing local currencies including HKD and CNH. The Branch has been holding adequate amount of high-quality liquid assets, mainly government papers, in order to respond funding needs in time of liquidity strain, and been conducting to diversify its funding sources and tenors for stable control of liquidity and balance sheet. Short term funding include interbank money borrowing in local and overseas markets, customer deposits from corporates of different industries, and issuance of certificate of deposit within 1 year through dealer to investors. Long term funding include interbank repo and cross currency swap for HKD funding stability, with tenors match with customer assets and with diversified maturity dates to avoid concentration risk.

5. Liquidity Risk Categorization & Early Warning Indicators

Mizuho Financial Group categorizes liquidity risk levels into three stages and sets early warning indicators (EWIs) to proactively manage risk.

5.1 Liquidity Risk Categorization

- Normal: There is no concern over obtaining sufficient funding.
- Anxious: There is concern over obtaining sufficient funding. (e.g. in order to secure necessary funding, Bank must pay a significantly higher rate of interest than it normally pays)
- Crisis: Required funding cannot be secured, and there is heightened potential for a disruption in the cash funding.

5.2 Early Warning Indicators (EWI)

EWI, which consist of a set of quantitative and qualitative metrics, including funding spreads, deposit trends, and market conditions will be monitored on a daily base in the identification of emerging risks at an early stage. These indicators/indexes are determined respectively according to the risk profile sensitivities of Hong Kong Office position taking and funding concern. Any excess will be discussed and consider the necessary on remedial actions.

6. Liquidity Stress testing

Mizuho manages liquidity risk mainly using stress testing.

Hong Kong Office conducts liquidity stress tests by applying both internal and regulatory-defined scenarios. These scenarios incorporate a range of factors, including:

- Market-wide stresses: Events such as financial market volatility, economic downturns, or systemic banking crises.
- Idiosyncratic stresses: Institution-specific shocks, such as a loss of market confidence or a downgrade in credit ratings.
- Combined stresses: A mix of market-wide and idiosyncratic factors to assess worst-case outcome

The scenarios are developed based on regulatory guidelines, historical data, and expert judgement. They are reviewed periodically to ensure they remain relevant and reflect evolving market conditions, regulatory expectations, and Hong Kong Office's risk profile.

Liquidity stress test results are calculated regularly, covering various time horizons, currencies, and specific risk concerns. This ensures a comprehensive assessment for Hong Kong Office's liquidity position across different dimensions. If the results indicate vulnerabilities or unsatisfactory outcomes, the ALCO is responsible for defining and approving remedial actions, which may include enhancing liquidity buffers, diversifying funding sources, or revising contingency funding plans.

7. Liquidity Risk Metrics

Hong Kong Office calculated different metrics and monitored them on a regular basis such as Liquidity Maintenance Ratio and Core Funding Ratio, etc. as part of the monitoring framework as well as complying the internal and regulatory requirements.

8. Liquidity Risk Mitigation Techniques

Hong Kong Office employs a range of techniques to mitigate liquidity risk, reflecting its proactive approach to risk management. The Office maintains a diversified funding base, including interbank borrowings, customer deposits, and access to Mizuho Bank's global funding network. A high-quality liquid asset (HQLA) portfolio, consisting primarily of government securities and other HKMA-eligible instruments, is held to provide a buffer against liquidity shocks. The Office also participates in the HKMA's Discount Window facility, using Exchange Fund Bills and Notes as collateral to secure overnight liquidity when needed. Additionally, limits on maturity mismatches and concentration risks are strictly enforced to prevent over-reliance on any single funding source or tenor.

9. Contingency Funding Plan and Recovery Plan

Hong Kong Office's Contingency Funding Plan (CFP) is an integral component of its liquidity risk management framework. It is designed to ensure that Hong Kong Office can effectively respond to potential liquidity crises by identifying reliable funding sources and outlining actionable strategies to address funding shortfalls under adverse conditions.

The CFP includes the following essential elements:

- Trigger Events: Clearly defined triggers that activate the CFP.
- Funding Sources: A diversified range of funding options, such as utilization of high-quality liquid assets (HQLA) held in Hong Kong Office's liquidity buffer, access to secured and unsecured funding markets, and activation of committed credit lines from counterparties or central banks etc.
- Roles and Responsibilities: A clear governance structure, specifying the roles of senior management, the treasury team, and other stakeholders in implementing the CFP.

As part of Hong Kong Office's preparedness, periodic rehearsals of the CFP are conducted. These rehearsals simulate stress scenarios and test the operational readiness of the CFP, including access to alternative funding sources, communication protocols, and decision-making processes. The results of the rehearsals are reviewed by senior management to identify areas for improvement and ensure the effectiveness of the plan during actual liquidity crisis.

(VIII) 薪酬制度

瑞豐銀行香港分行的薪酬委員會負責實施本行的薪酬政策，並獨立於管理層。
該薪酬政策適用於所有本地員工，外派人員和僱傭人員的薪酬制定則會分別遵從總行或員工所隸屬之分行的薪酬政策。

薪酬委員會由四名成員組成，由亞太地區總行擔任主席，其它成員包括亞太戰略企劃部主管、副主管及負責人力資源的香港行政部門副主席。於二零二五年度，薪酬委員會召開了一次會議以檢討本行薪酬制度的運作，另在區域層面共召開三次會議以討論薪酬方案。

薪酬委員會負責監督以下職級人員之總薪酬：

「高層管理人員」- 負責監督本行的整體策略、活動或重要業務。

「主要人員」- 其職業或活動涉及承擔重大風險或代表本行承擔重大風險的個別僱員。

薪酬委員會確保對本行的薪酬政策及運作進行定期（至少每年一次）及獨立於管理層的檢討。

薪酬政策的設計及實施

本行的薪酬政策為薪酬制度制定架構，並概述員工的薪酬方案，通常包括基本工資、花紅和適用的附加利益。其「整體薪酬回報」方針旨在提升薪酬方案的整體性、靈活性和業績表現。

風險管控及合規人員所獲發放的薪酬是獨立於其負責監督的業務單位和範疇的業績。

健全風險管理與未來風險的管控程序

本行所成立之薪酬風險顧問小組獨立於各業務單位，並負責根據本行的風險管理和合規原則持續地檢討和評估香港本地員工的整體薪酬政策。

浮動薪酬

(例如：對绩效奖金之設立旨在促進本行長遠價值創造並與風險範圍相衡，有關風險包括但不限於信貸、市場、利率、流動性、營運、監管、法律及戰略風險，並以員工在本行的職級、角色、責任及活動為依據，同時務求在吸納及挽留優秀員工時提供誘因。薪酬委員會就薪酬方案的實施有最終決定權。

薪酬水平與表現評估的關係

本行採用平衡計分卡方法來考核員工，以評估員工於財務性及非財務性方面(包括個人風險管理、合規意識，以及其他量化和定性化指標)之表現。任何非財務性方面的基安表現，應抵銷在財務方面的良好表現，並應相應地調低甚至取消任何浮動薪酬。

本行在發放浮動薪酬時會考慮各個部門、業務單位、和公司業績的財務性和非財務性因素，以及挽留員工方案和其他相關的因案。如發放浮動薪酬並不符合本行財務穩健性政策和程序，本行可行使對權衡對發放的浮動薪酬作相對調整。

薪酬調整

本行專為運籌高於薪酬紅門處的香港本地員工設立了遞延花紅政策。該政策一般會根據員工對本行及所隸屬部門之整體風險狀況和長遠價值創造作出適切獎勵，同時鼓勵員工長期留任於本行並激勵員工士氣。

本行採用「扣減」和「收回」之安排來調整遞延薪酬：假若員工因違反本行政策規定的條款而被終止僱傭關係，該等遞延薪酬將被取消。薪酬委員會可根據實際情況酌情取消全部或部分已歸屬或未歸屬的花紅。於二零二五年度，本行沒有「扣減」或「收回」任何遞延薪酬。

發放浮動薪酬的形式

浮動薪酬是以現金形式支付。一般而言，浮動薪酬佔總薪酬的比例將根據員工職級及承擔重大風險程度而選擇。本行並沒有提供其他形式的浮動薪酬。

高層管理人員及主要人員之薪酬

於二零二五年度，本行有18名員工被列為高層管理人員，有38名員工被列為主要人員。

關於本行高層管理人員及主要人員之薪酬於二零二五年度之薪酬總額資料（以固定薪金及浮動薪酬劃分），現羅列如下：

由於薪酬資訊具敏感性，薪酬將會以總額顯示。

	2025年度		2024年度	
	非延付薪酬	延付薪酬	非延付薪酬	延付薪酬
薪酬金額（港幣）				
固定薪酬				
現金	77,194,157	-	63,408,847	-
浮動薪酬				
現金	24,625,705	5,079,347	19,291,855	4,270,570

按(1)2025年度內歸屬及支付及(2)於2025年度尚未歸屬，而劃分之延付浮動薪酬總額，現羅列如下：

	2025年度		2024年度	
	就2025年度之表現所發放之總額	就2025年度前之表現所發放之總額	就2024年度之表現所發放之總額	就2024年度前之表現所發放之總額
薪酬金額（港幣）				
歸屬及支付溢利息支出				
現金	-	4,444,772	-	3,030,226
尚未歸屬				
現金	5,079,347	4,087,843	4,270,570	3,991,845

2025年度高層管理人員及主要人員之薪酬被保留之尚未歸屬延付浮動薪酬之總額為幣九百一十六萬七千一百八十九元五角。

(VIII) Remuneration System

Mizuho Bank, Ltd., Hong Kong Branch's Remuneration Committee ("RC") which is independent from management is the governing body of the Bank's Remuneration Policy which applies to all Local Employees of the Bank. Expatriates and Seconded is governed with policies set out in Head Office or respective home Branch separately.

The Remuneration Committee comprises of four members, with Managing Executive Officer (Asia-Pacific) as Chairman, Managing Directors from Head of Asia-Pacific Department, Deputy Head of Asia-Pacific Department and Deputy Head of Hong Kong Administration Department in charge of Human Resources. In FY2025, one meeting was held to review the operations of the Bank's remuneration system while three meetings were held at regional level to discuss remuneration packages.

The Committee has oversight of the total remuneration for the below:

"Senior Management" who are responsible for the oversight of the overall operations of the Bank or a major business line.

"Key Personnel" who are individuals whose duties or responsibilities involve the assumption of material risks or taking on of material exposures on behalf of the Bank.

RC will ensure that at least an annual review of the Bank's remuneration system and its operations is conducted independent of management.

Design and structure of remuneration process

The Bank's Remuneration Policy formulates the framework of the Bank's remuneration system and outlines an employee's remuneration package which usually composes of base salary, bonus, and applicable fringe benefits. A "total reward" approach appreciates totality, flexibility, and performance drivers of the remuneration packages.

Risk and compliance employees are remunerated independently from the business performance of the business units or areas which they oversee.

Current and future risks in remuneration process

The Bank has established the Remuneration Risk Advisory Group ("RRAG"), which acts independently from business units. RRAG is responsible for continuously reviewing and commenting upon the broad policy for the remuneration of Local Employees in Hong Kong vis-à-vis risk management/compliance principles.

Variable pay (e.g., discretionary bonus) is structured to promote behaviors that enhance long-term value creation with time horizons of risks, including, but not limited to: credit, market, interest rate, liquidity operation, reputation, legal and strategic risk, taken into account while providing incentives to attract and retain talented employees in reflecting their seniority, role, responsibilities, and activities within the Bank. The conclusive remuneration packages are subject to variation in consideration of the RC's final judgment.

Link of performance measurement with levels of remuneration

Employees are evaluated with financial and non-financial performance, with a balanced scorecard approach assessment of an individual's control and risk and compliance awareness, and other quantitative and qualitative measures. Any negative non-financial performance may outweigh the performance on financial areas, leading to reduction or elimination of variable pay that an individual may have otherwise been awarded.

The award of variable pay also considers the financial and non-financial factors of the departmental, business unit, and corporate performances, as well as staff retention reasons and other factors the Bank considers relevant at its discretion. The Bank shall have the discretion to adjust the variable pay if it is not justified with the financial soundness of the Bank, including compliance with the Bank's policies and procedures.

Adjustment of remuneration

The Bank has established a bonus deferral plan to all Local Employees in Hong Kong whose bonus is greater than a pre-defined bonus threshold. It rewards staff in line with the risk profile and the longer-term value creation for their respective divisions, and the Bank in general, whilst encouraging the ongoing retention and motivation of employees over the longer term.

The Bank adopts the respective arrangements of "Malus" and "Clawback" for adjusting deferred remuneration which will be forfeited if an employee's employment is terminated with clauses as stated in the bank's policies. The RC in its discretion, can deem it appropriate to forfeit or reduce in whole or in part, of the vested/unvested bonus. In FY2025, the Bank confirms that no "Malus" or "Clawback" has been executed.

Form of variable remuneration

Variable remuneration is paid in form of cash. In general, the percentage of variable pay over total remuneration will increase based on the seniority of the employees and the level of assumption of material risk that the employees undertake. No other forms of variable remuneration are offered by the Bank.

Remuneration of Senior Management and Key Personnel

There were 18 employees being classified as Senior Management and 38 employees were categorized as Key Personnel during financial year 2025.

Aggregate quantitative information on the remuneration for the Bank's Senior Management including key personnel during financial year 2025, split into fixed and variable remuneration, are set out below:
